

ARISTONCAVI

Brendola, 23-02-2022

k.a. to:

KLAUS FABER AG

Object:

Declaration on products supplied in relation to the Regulation (EC) n° 1907/2006 (REACH)

Concerning the requirements of the Regulation in object referring the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), ARISTONCAVI is a "downstream user" of substances in order to realise an item (electrical cable) without deliberate release of substances, therefore, as neither producer neither importer of substances, it has not required the registration of own products.

However, Aristoncavi is involved in team-working with own suppliers to reach the Regulations's objectives, verifying that they have registered the supplied substances and/or in case of mixtures, these are produced in accordance to the REACH Regulation (communication of updated SDS, inclusion of our use, etc.).

Aware of our obligation to keep you updated pursuant to art. 33 of the Reach Regulation regarding the substances added to the SVHC list, taken in consideration the last update of the Candidate List emitted by ECHA (inclusion of new SVHC substances, with decision number D(2021)10043-DC), we have to inform you the presence in some our products of the following substance in amount greater than 0.1%: tris(2-methoxyethoxy)vinylsilane; N.CE 213-934-0; N.CAS 1067-53-4
The type of our cables containing the above substance are the following:

NSHXAFÖ 1.8/3kV
NSSHÖU 0.6/1kV
URSUS MT FO KN PLUS 6/10kV 12/20kV
URSUS MT SC PLUS 12/20kV
URSUS MT PLUS 12/20kV
URSUS MT PLUS KN 12/20kV
URSUS SUB-E FO PLUS 6/10kV - 12/20kV
URSUS VS PLUS 0.6/1kV

for any additional request for information, write to Mr. Matteo Pirana (m.pirana@aristoncavi.com)

kind regards

Aristoncavi S.p.A.
